

EPRI Smart Distribution and Power Quality 2015 Conference and Exhibition

“Discovering Innovations for the Future Grid”

June 22-24, 2015, Hyatt Regency Columbus, Columbus, Ohio

Dear Potential Exhibitor,

The Electric Power Research Institute (EPRI) and American Electric Power (AEP) invite you to be an exhibitor at the EPRI Smart Distribution and Power Quality 2015 Conference and Exhibition. For more than 25 years, this international conference has provided a forum for electric power end users, distribution engineers and project managers, technology manufacturers, and reliability and power quality (PQ) professionals to gather, share experiences, and learn from one another in a highly collaborative environment. We are excited to be holding this year's conference in downtown Columbus, Ohio.

On Monday evening, June 22, 2015, we will hold our evening reception in the Exhibitor Area. This is an important part of the conference for exhibitors as it allows all attendees to mix and mingle with the exhibitors and learn about your products and services. This year we will be offering eleven (11) 8' X 10' Exhibitor Booth packages and six (6) Table Top exhibitor packages, as well as other sponsorship opportunities for this conference.

We are enthusiastic about this year's conference and the valuable opportunities that have been designed by our conference team. EPRI is pleased to announce the launch of a new supplemental project, the ICT Innovators Forum, which is designed exclusively towards solution providers, like you. The annual meeting for this new supplemental project coincides with this utility/vendor conference. I hope you will join us in this new level of engagement at this year's conference. Attached you will find support information about the conference and exhibition.

If you need any additional logistical information at this time please feel free to call or email Laura Abbott at (865) 218-8026 or labbott@epri.com or contact me with technical questions at (865) 218-8194 or jstevenson@epri.com.

Best Regards,

Jeff Stevenson
EPRI Smart Distribution and Power Quality Conference Project Manager
